THE STATE OF HEALTHCARE CONSTRUCTION

The Healthcare Construction Market is Strong

$400 billion in the construction arena of health care facilities

4.4% growth in hospital project start square footage

61% of owners report that their hospitals have an integrated BIM (Building Information Modeling) program

A Design-Led Sector Putting Patients First

60% of owners are using patient-centered design

86% of owners are using evidence-based design

AN EVOLVING LANDSCAPE

7% of all Healthcare Construction spending goes toward technology

40% of owners believe that a hospital’s technology must be fully integrated with others in the healthcare system

60% of owners are looking at telehealth in the future

A Growing Tech Presence

65% of healthcare owners have implemented patient portals

48% of owners are using EMR on projects

34% of owners are using EHR on projects

Top Healthcare Contractors

1. Turner
2. McCarthy
3. Brasfield & Gorrie
4. Skanska
5. DPR

$2,652,011,528
$1,459,997,952
$1,250,654,622
$966,349,868
$887,444,000

4 Essential Technologies for the Future of Healthcare Construction

1. Enhanced Safety Management
2. Advanced Telemedicine
3. Virtual Reality
4. Augmented Reality

Collaboration Software

Fully integrated process

Integrated data management

Full-featured software

Fully integrated data management

Enhanced Safety Management

Integrated data management

Virtual Reality

Augmented Reality

Telemedicine

Data and Analytics

Maintenance and project tracking
