

# Technology Corner Profile

Low productivity and a low digitization rate have sparked an influx of new technology being developed, which has the potential to make a profound impact on the risks involved on construction projects and within asset management such as safety risk and design risk. Aon understands that this trend may be of interest to our clients and has created the Technology Corner to profile different construction technology and asset management companies. Each profile gives an overview of the technology, addresses its risk treatment potential, and identifies what insurance policies its implementation could impact. Our goal is multi-faceted to raise awareness about leading construction and asset management technologies that could help reduce risk on site for the purposes of educating our clients and the insurance markets.

## Product Description

PlanGrid's easy-to-use mobile-first technology gives construction and operations teams access to all project data everywhere they go. PlanGrid empowers GCs, Subcontractors and Owners to collaborate in real-time and keep up with changes as they happen. By streamlining document management and control, providing collaborators with easy access to all project information from any device, and collaborating on a common platform, teams create a comprehensive record of the construction and operations phases of a project's lifecycle. Benefits include:

Data

Good data leads to better decisions. PlanGrid mitigates risk throughout the project lifecycle by automatically capturing that history and data.

Productivity

By providing immediate access to up to date plans, specifications, progress photos, and tasks, customers save an average of 6.5 hours per employee per week.

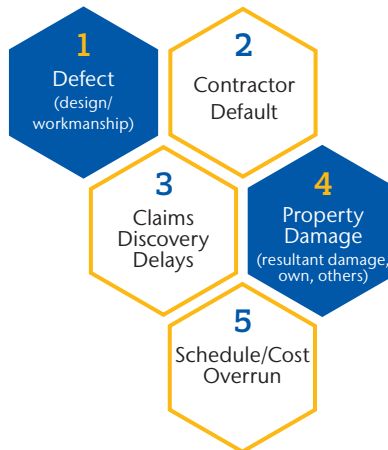

Budget

PlanGrid increases team collaboration and ensures everyone is building from the most current set, reducing overruns from rework and costly delays.

## Risks Treated

Key risks mitigated by PlanGrid's system include:

### Company Profile

**PlanGrid**  
2111 Mission St, Floor 4,  
San Francisco CA, 94110

**CEO/Founder:**  
Tracy Young

**Category:**  
Intelligent Record Set, Remote  
Connectivity, Lifecycle Data

**Website:**  
<https://www.plangrid.com/>

**Location:**  
Global - Headquarters in  
San Francisco with local presence  
throughout the US and in Canada,  
UK, Hong Kong and Australia

## Impacted Insurance Policies

Insurance policies that will be positively impacted by PlanGrid:

- Professional Liability
- Construction All Risk / Builder's Risk
- Wrap-up Liability

## Comments from the Founder

“Throughout an asset’s lifecycle, teams need to make decisions faster to build and maintain with more confidence with less risk. With PlanGrid, data is collected, distributed and transferred from design through construction to operations. PlanGrid reduces risk by providing access to critical data at the point of decision regardless of the lifecycle phase.”

- Tracy Young, Co-Founder/CEO
